## PROJECTS

---

### Exam-genie

*Technologies used: React.js, Express.js, Sass, Html, Bootstrap, OpenAi, Chart.js, Auth0, PostgreSQL*

Developed a question generator application for exam preparation, incorporating Artificial Intelligence for question generation and providing feedback on correct answers. The application includes a challenge or game section for collaborative studying. Additionally, the application saves the exam history for future reference.

### PhotoLabs

*Technologies used: React.js, Node.js, PostgreSQL, Sass, Html*

Designed and developed PhotoLabs, a cutting-edge React-based single-page application (SPA) that revolutionizes the way users interact with photos. Empowered users to explore and view photos in diverse contexts, offering a seamless and immersive experience.

### Tweeter Clone

*Technologies used: JavaScript, Css, Html, PostgreSQL*

Developed a Twitter clone application showcasing proficiency in JavaScript, AJAX, Node.js, HTML, and CSS. Utilized asynchronous coding methods to ensure real-time responsiveness to user inputs.

### Jungle

*Technologies used: Ruby, Rails, Html, Sass*

Developed Jungle, a robust e-commerce application using Rails 6.1. Leveraged the power of Ruby on Rails framework to create a scalable and efficient platform. Implemented essential features such as user authentication, product listings, shopping cart functionality, order processing, and payment integration. Ensured a seamless user experience by incorporating responsive design principles and intuitive navigation. Demonstrated strong problem-solving skills and attention to detail throughout the development process.

### Resource Wall

*Technologies used: JavaScript, Express.js, Html, Sass, PostgreSQL*

Developed and implemented the Resource Wall project, a dynamic platform for sharing and exploring photos on various topics. Each photo or post includes URL links to provide additional information related to the topic. Enabled user interaction through features such as commenting, rating, and liking posts.
